DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 , drawn to a method of exercise, classified in class 482, subclass 114.
 - II. Claims 7-15, drawn to a method of exercise, classified in class 482, subclass 64.
 - III. Claims 16-20, drawn to a method of exercise, classified in class 482, subclass 112.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I,II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are methods of using three distinct types of resistance mechanisms,e.g, a wheel resistance (cls 1-6); a belt resistance (cls 7-15); or a hydraulic pump resistance (cls 16-20).Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Each method uses, in the absence of prior art, a patentably distinct resistance mechanism.
